

The Institute of Trichologists

Continual Professional Development

Registered Member CPD Requirements

All Registered Members must commit to ongoing professional development, as such a minimum of 5 Recognised Continual Professional Development, (CPD) points need to be accumulated at least annually. Any Registered Member who undertakes additional education and qualifications for use within their Trichology Practice may submit these to the Institute of Trichologists for approval to add to their Members Listing which details each Members levels of competence.

Member CPD Records

Registered Members continual professional development records are stored in the Institute of Trichologists member database.

The Institute of Trichologist's CPD Accredited Events

The Institute of Trichologists holds multiple events accredited with CPD points throughout the year, offering Registered Members and members of the public a minimum of 10 CPD points per year.

Registered Members who attend the Institute of Trichologists' CPD accredited events will automatically be awarded with the CPD points on completion of the event, updated in the members database.

All events hosted by the Institute of Trichologists awarding continual professional development points have undergone the assessment process as required by The CPD Certification Service, and have been accredited as a CPD certified event prior to any points being awarded to registered members.

External CPD Accredited Events

Registered Members of the Institute of Trichologists can send proof of continual professional development points obtained from CPD accredited bodies external to the Institute of Trichologists for these points to be added to their CPD records.

To qualify for CPD points to be added to member records, the registered member must:

- Provide proof of being awarded continual professional development points through certificate of attendance to event or similar
- Be from a continual professional development accredited event that is relevant and related to Trichology
